

# Urgent

## Plessis Road to close for 1 year and 5 months. 16,000 vehicles a day need to find alternate routes.

The City will close Plessis Road at the CNR Redditt line to construct a new underpass with 16,000 cars per day rushing through Transcona and Mission Gardens streets to get to Lagimodiere or Ravenhurst, or Bournais.

- If you are an area driver who uses these routes, prepare for gridlock every day.
- And if you are a resident, be prepared for cars speeding down your back lane.
- Ambulances, police vehicles, and transit buses will be rerouted and severely delayed.

## We need the City to stop the closure of Plessis by building a two-lane asphalt road on the west side.

This option was considered by the City, but rejected because it would delay completion of the project.

The City would rather cause delays and extra costs, including your gas and time, to 16,000 drivers for 1 1/2 years, rather than do the sensible thing and keep Plessis open during construction of the underpass.

## Make Your Voices Heard Before It's Too Late!
